**Motorlease Corporation Introduces Personal Use Tracking System
On-Line System Facilitates Vehicle Personal Usage Reporting for Fleet Customers**

FARMINGTON, CT, May 22, 2007 – Farmington, CT-based Motorlease Corporation, one of the nation’s oldest and largest independent leasing companies, today announced the launch of the Company’s new Personal Use Tracking System™ to help its fleet clients meet Internal Revenue Service reporting requirements. The new, Internet-based system enables fleet customer employees to track personal vehicle use online, facilitating easy, more accurate, month-by-month reporting.

“We believe the Personal Use Tracking System will make IRS reporting dramatically easier for our clients,” stated Jack Leary, President of Motorlease. “Each year, our customers spend a great deal of time ‘chasing down’ usage information for every one of their employees. This process is further complicated when employees leave the company, switch cars, or use multiple cars in a given year. Our new system improves accuracy and eliminates the headaches associated with IRS reporting.”

The IRS requires all businesses to provide employees with W2 forms based on a calculation that reflects each employee's personal use of company vehicles. Motorlease Corporation's Internet-based Personal Use Tracking System enables clients' drivers to log in, enter ID and password, and load their business and personal miles on a monthly basis. Drivers receive an email from Motorlease each month reminding them to update their mileage; and the system is self-policing – drivers must report mileage or their usage will be reported as 100% personal. At year-end, Motorlease will calculate the appropriate data, and provide clients with an employee-by-employee report.

The screenshot shows a web interface for a user named JOHN SMITH. At the top, it says "Welcome - JOHN SMITH" with a link "(Log Out/Cancel)". Below that, it states "Your vehicle is a 2004 SIENNA LE AWD" and "Last mileage reported was 44650 as of 12/1/2006 with a total of 0 business miles this year". A horizontal line separates this from the "Personal Use Log Entry" section. This section contains three input fields: "What is your Current Mileage", "How many business miles are included in this entry", and "What is the Date for this entry" (with a date picker showing "mm/dd/yy"). A "Submit" button is located below the fields. At the bottom left, there is a link "(View all of your log entries to date)".

The Personal Use Tracking System improves accuracy and eliminates the headaches associated with IRS reporting.

About The Motorlease Corporation

Founded in 1946, and headquartered in Farmington, Connecticut, The Motorlease Corporation is one of the nation's oldest and largest independent automobile leasing companies. This third-generation family-owned Connecticut company specializes in automobile leasing and fleet management programs for corporations throughout North America and Europe ranging from small companies to larger corporations with extensive leasing needs. Motorlease offers a wide range of management programs that simplify the

process of running a fleet, eliminate costly internal record keeping, and simplify tax-reporting. Additional company information is available at www.motorleasecorp.com.
